Don't sweat it

Because of that, ever since I was little, Mama was all everyone ever talked about
My Mama, Tonegawa Midori, is a biology professor at a famous university
Not to mention Mama is always busy with research and lectures
Yeah, but..
It's way better than him seeing you react over the forbidden word
Actually
Who cares about Science ?
Like when will I even use it anyway
She neglec -ted me
Well, not that it matters

Accessories

Decorated hand mirrors have been the bomb lately!
Smart Phones too!

They're all important parts to enjoying fashion

"Don't understand"? How rude of you
Well
I suppose someone with a score like this wouldn't understand
Tonegawa Lilica, you're a Science prodigy, are you not?

Because of me, Ezaki-kun is..!
What should I do..?
Some-one ..!
You should run for it Tonegawa-san!!
I'll be fine so
Hm?
HELP ME!!

We got caught up with some baddies ...
Ezaki -kun is.. My class-mate is.. in a bad situation ..!
..So there's 4 of them, huh ..?
From here, it looks like their body mass is 67kg, 70kg, 68kg, and 72kg
My body mass is 62kg, there's a 98.7% chance that I will lose
WHAT ARE YOU SAYING AT A TIME LIKE THIS!? SCIENCE IDIOT!!
What should we do ..?
At this rate, I'm willing to do anything so
Please help him..
Any-thing.. eh?

Well, there is a way to save him
REALLY !?
Are you willing to use your head with science ?
ARG JEEZ ..
SCIENCE OR WHAT-EVER IS FINE SO JUST
SAVE HIM !!
Then I guess the contract is sealed
The sun's position is sitting right at noon, eh?
then this means eureka
Huh?

Do you have any mirrors on you ?
I do, but.. Why mirrors ?
Now
Let's solve this with Science
FWISH
Huh?
Are you ready to give up ?

Oh, it's just you eh?
Tone-gawa -sa..

FINISH YOU GUYS

DAM-
MIT
My eyes..
MY EYES ..!
WHAT'S WRONG !?
FALLS
UWA

THOSE GUYS ARE USING MIRRORS TO FLASH LIGHT AT US
THERE'S SOMEONE BEHIND THERE TOO
You stupid or some-thing ?
We'll be fine if you just dodge thes..
FLOP
GUA
!?
THEY -'RE OVER HERE
AND THERE TOO..
THAT LIGHT'S CHASIN' US NO MATTER WHERE WE RUN!

HOW MUCH FRIGGIN' PEOPLE ARE THERE!?
WE'RE SURRO-UNDED IN THIS PARK!
Whew
That's right, hurry up and scram!!
.....
Wow
It really did go well!!
Tone-gawa -san
Ezaki -kun! Are you alright?
Yeah, I'm fine
※Don't try this at home
※危険なので 絶対にマネはしないでね!

It's just me and this guy
There's not a lot of people !
Any ways
How did you manage to gather so many people in such a short amount of time?
Hm
Just you two ?
But all through out the park the light is..
Ezaki -kun, try stand -ing over there
Tap
FLASH
WA
IT'S BRI- GHT !
FLASH

We placed 8 mirrors around the park!
Other mirrors ...?
We placed mirrors where the sun's rays are already being reflected by other mirrors
That way, the light reflected from the first mirror will then reflect and hit the baddies
We didn't just reflect the sun's rays
It's made so that numerous other mirros would reflect each other's light too
In other words
It's the same logic as billard
To get a ball in to the hole, you hit the white ball in various different angles which knock other balls, right?
You have to consider which angle you hit the ball at, and what angles the balls will bounce back in
That's what we just did with the mirrors too

If you just consider the angle of the sun's rays and the angles it'll reflect
It's possible to make it seem like the light's chasing you through the park
Because there's no one that can look the sun's rays straight in the eyes
But I'm just glad you're alright, Tonegawa-san
Thanks, you two

Um
You saved us..
Thank you
Sigh
Huh?
Speaking of which, you really did put in a lot of effort
Are you sure you're not like your parents afterall?

The angles on the mirrors were perfect
You'd have to think about things like the angles of the sun's rays and the position of the targets!
Normal people can't do this
I don't know
All I did was aim at the enemies
.....
I shall give you this
What's this?
It's a flask that can summon a famous scientist

It seem's I'm late for my self introd-uction
I am ancient Greece's greatest scientist
ARCHI-MEDES
Now that I'm here
I shall make you like Science

Archimedes 287BC.-212BC
ERR
Was a scientist that lived in the B.C. era
Something something Acrchimedes
During the battle of Syracuse he burned the enemy ships by using sunlight and mirrors..
HEY THIS CAN'T BE TRUE !!!
You claiming come from the B.C. era is too unrealistic
WHH AAA TTT — !?
SM
ACK

You even made me hold some weird flask..
I'M NOT EVEN TALK -ING ABOUT THAT!!
What I really did was blind the enemies with light, then shot them with arrows of fire
That's just a legend
NOT TO MENTION YOU EVEN FOLLOWED ME BACK TO MY HOUSE!

You're the type that belives what anyone says, right?
He he
Gulp
